THE HENRY FRANCIS du PONT
WINTERTHUR MUSEUM
LIBRARIES

INTRODUCTORY.

In presenting this Catalogue To the Public, we do not attempt to give but a few of the designs manufactured by us, but we wish to call the attention of the people to the fact that we are making Iron Fences, Stairways, Tree Guards, Stable-Fixtures, Fire Escapes, Window Guards, Gratings, and all kinds of architectural iron work. Our work will compare favorably with the best in quality and price, and we hope that if in need of anything in our line, you will write us.

To Engineers and Architects. We make a specialty of Iron Stairways, Balcony Railings, Crestings and Finials, and are prepared to give lowest figures on any designs and specifications. We are constantly adding new

designs, and if you don't find anything to suit you in this catalogue, we can show you other designs or make just what you want from your plans.

We make all fences contained herein, in heighth, and weight of iron to suit our patrons. Prices and full particulars on application. In writing for information give number of design.
